

Understanding your operation, engineering your solution.

Equipment manufacturing, electric machinery and specialist services for ports, terminals and industrial sites.

01 Port Consultancy

Port construction, capacity development, yard layout, equipment selection and operational improvement.

02 Equipment Manufacturing & Sales

Lifting, transport and handling attachments. Mechanical, structural, hydraulic and automation solutions tailored to your needs.

03 Electric Port Machinery

Sales and selection support for electric tractors, heavy-duty forklifts and empty/laden container handlers.

04 Vessel & Cargo Surveys

Incoming cargo condition assessment, discharge monitoring and reporting of findings.

Logistics support: Planning and coordination for project cargo, vehicle logistics and vessel chartering.

SUITED TO YOUR CARGO. BUILT FOR YOUR OPERATION.

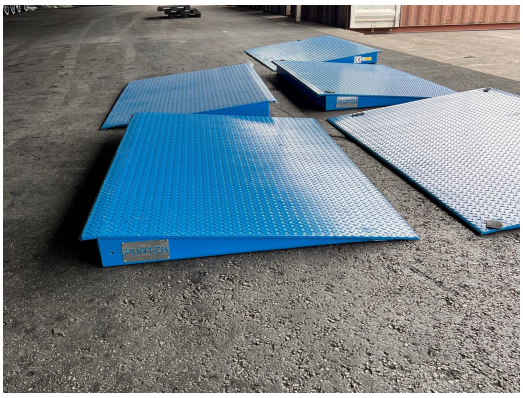

Port Equipment

Standard and custom-built solutions developed for site conditions, cargo characteristics and operating requirements.

Ramps & Platforms

Mobile and fixed ramps, loading platforms and hydraulic applications.

Container Loading Ramps

Dimensions and application options for access between the yard and container.

Lifting Beams & Spreader Frames

Design and manufacturing to suit load geometry and lifting points.

Personnel & Lashing Baskets

Solutions tailored to the working methods and site requirements of port operations.

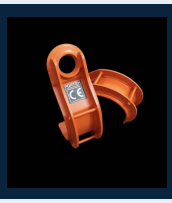

Plate Clamps & Custom Manufacturing

Plate lifting clamps for steel plates; C-hooks, semi-automatic spreaders and custom cargo handling attachments.

ELECTRIC PORT MACHINERY SALES

The future of operations is electric.

We work with you to assess machinery options suited to port and terminal operations.

Electric Terminal Tractors

Electric tractor options for transport within terminals.

Selection based on operating patterns, site conditions and charging needs.

Electric Reach Stackers

Solutions for empty and laden container stacking and terminal handling.

Heavy-Duty Electric Forklifts

Capacity and attachment options suited to heavy-load handling.

Selecting the right machine: Capacity, operating hours, battery and charging options are assessed against site requirements.

FIELD APPLICATION, SUPPORT THROUGHOUT

From need to solution.

ZPMC & DHHI Spare Parts

Mechanical, hydraulic, electrical and spreader parts enquiries for cranes and port equipment. Sourcing is assessed using the model, serial number and part number.

Vessel & Cargo Surveys

Cargo condition, visible damage and findings during discharge are documented in clear reports.

NEEDS ASSESSMENT	SOLUTION DEVELOPMENT	IMPLEMENTATION

Let’s discuss your project.

Tell us about your cargo and operating needs.
